Baby Rambler

The descriptive name of this extremely valuable new rose, "Dwarf Crimson Rambler," seems a misnomer, yet nothing is more appropriate, for the fame of the "Crimson Rambler" properly belongs to it. It forms compact bushes about two feet high when fully grown, and is fully covered with clusters of its rich, crimson-red flowers throughout the season. It begins to bloom when in small pots and is practically never out of bloom for the balance of the season. Perfectly hardy; it requires no winter care, and should improve each year with good culture. The coloring is brighter and more persistent than its parent, the "Crimson Rambler," of which it is a seedling. The size of the clusters and the number of flowers in each are the marvel of all beholders. Its use is varied so as to render it invaluable. As a bedding variety, to make a low, attractive hedge, to border a walk, for planting in cemeteries, or for growing in pots in the house, it stands alone and must find its way everywhere. Remember it is hardy and perpetual flowering. Price, 15 to 35 cents.

It has been found by prominent florists to be a splendid forcing variety. Field grown plants, 35 to 50 cents. Pot plants, 10, 15, 25 cents.

F E R N S

The New Parlor Fern, N. Scotii—It is in essence a condensed form of the Boston fern, with valuable characteristics added, which are not evident in the parent. Of much dwarfer and bushier growth than the Boston

Fern. The fronds droop gracefully and are not as long and coarse as the Boston. It is a rapid grower and one of the hardiest plants for the house. Price, 15, 25, 35, 50 and \$1.00.

The Boston Fern.

This is a wonderfully healthy, rapid growing and graceful house plant, in great demand. Many people have bought it in preference to the finest palms or rubber plants. Thrives in all rooms, gas or furnace heat does not seem to injure it. Fronds are often six to seven feet long, a 4-inch plant increasing to 10-inch size in a year, besides making many new offshoots. A good size plant contains from 20 to 40 fronds, and the fresh ones continually coming out with new growth are very beautiful. Best of all for hanging baskets. Our plants are well established in pots, not weak runners torn loose from soil. Prices, 15, 25, 35, 50, 75 cents and \$1.00. Specimen plants, \$3.00 to \$5.00.

Nephrolepis Cordata Compacti—

A more compact and erect variety than the "Boston Fern," gracefully arching and useful for decoration. Price, 10, 15 and 25 cents each.

Ostrich Plume Fern, Nephrolepis,

Piersoni—This new fern is the most important addition to this line of plants in many years. The plant possesses the same vigorous growth that is characteristic to the Boston Fern, with long, graceful fronds, but with each pinna or leaflet subdivided so as to form a perfect miniature frond, grows broad and heavy, and measures when fully developed, at least six inches across, increasing in beauty as they develop. Plants, each, 25 cents to \$3.00.

The New, Elegant, Plumed Fern.**Nephrolepis Piersoni Elegantissima**

—This is a sprout from the Pierson Fern, in which the plummy peculiarity of the original form is even more distinctly developed than in the original; the side pinnae being again subdivided and standing at right angles to the direction of the midrib, makes both sides of the frond equally beautiful, while, at the same time, the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Prices, 25, 50, 75 cents, \$1. and \$1.50.

thrifty, strong growing fern; height, three to four feet; width of leaf eight to ten inches. Plants should be gotten early. Each, 25 cents. Should be taken in April.

VEGETABLE PLANTS

We make a specialty of raising vegetable plants and shipping hundreds of thousands of plants annually. We ship large quantities of plants to distant states and territories. Our system of packing is so complete that we rarely ever have any plants damaged. All vegetable plants sent out by us are raised from the same seed that we use ourselves; in fact we do not offer any plants for sale that we do not set out large quantities from the same beds in our own garden. All plants are raised from the best of seeds, regardless of cost of seeds. Early cabbage should be set out in April—the sooner the better; second early, about May 1st; late cabbage from May to the last of July

CABBAGE PLANTS.

All Season—This excellent strain of early Drum Head cabbage is as early and good as the Early Summer, and growing a third to half as large again. As the name indicates, it can be planted at all seasons, and makes both a splendid early and late variety. It forms a fine large head of superior

variety, not bursting after heading. Strong plants ready April 1st. Transplanted plants 10 cents per dozen; 60 cents per 100; \$5.00 per 1000; not transplanted 50 cents per 100; \$4.00 1000; after May 1st, per 100, 30 cents; per 1000, \$2.00.

Henderson's Summer—For second planting we have never found any superior to this. It stands the hot sun well and usually forms large, solid heads of fine flavor. Good, stalky plants ready April 1st. Transplanted plants 10 cents per dozen; 60 cents per 100; per 1000, \$5.00; not transplanted 50 cents per 100; \$4.00 per 1000; after May 1st, 30 cents per 100; per 1000, \$2.00.

Premium Late Flat Dutch—(Late). There may be other varieties of late cabbage just as good as this; still, in our fifteen years' experience in market gardening we have found none that we consider any better; plants ready from May 1st to July 10th; per 100, 25 cents; per 1000, \$1.75.
